

Out of an abundance of caution, the Hall County School District is asking that individuals who have traveled to countries designated by the CDC as level two or higher in the past 14 days not attend district extracurricular activities. This includes events held on campuses and at school-sponsored activities off site. Once these individuals have self-monitored for 14 days and have presented no symptoms, they may return to our schools' extracurricular events.

We greatly appreciate our public's support of our students and programs. However, these measures are now in place to protect the health of students, staff members, and the Hall County community.
