

The Hall County School District continues to update practices and protocols to ensure the safety of its students, team members, and community, regarding the coronavirus (COVID-19).

Out of an abundance of caution, we are currently requiring all students and registering new students who have traveled outside of the United States in the past 14 days to call their school for guidance regarding COVID-19. Students should call prior to coming to school or attending any school activity. This also includes students who have had family members or individuals living at home who have traveled outside of the United States in the past 14 days.

Hall County School District team members who have traveled outside of the United States in the past 14 days should contact their principal or direct supervisor prior to coming to work or to any school campus activity—before, during, or after school hours. This also includes school volunteers, community coaches, and all team members who have had family members or individuals living at home who have traveled outside of the United States in the past 14 days.

We have protocols in place for additional steps for those individuals who have visited countries designated as “high risk” by the federal government. A list of those countries will be updated daily at the following link:

<https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

We apologize for any inconvenience, but it will remain our priority to do all that we can to keep our students, staff, and community safe.

Visit www.hallco.org for updated information.

Yours truly,

Will Schofield
